

Dear Fifth Grade Parents,

To prepare your child for fifth grade math the school has a summer project they need to complete. They will continue working throughout the summer on their IXL account.

Listed on the back are the lessons that should be completed over the summer. Each lesson should be mastered to a 90. These are all review lessons. At some point during the summer IXL occasionally changes the number of the lesson. If the number does not match the description look for the new number that matches the description of the lesson. This review of math skills will help your child have a successful school year in math.

Your student will receive a 100 as their first test grade of the first quarter for completing this project!

Knowing their math facts is essential if they are to have a successful year in 6thth grade. One way to assure mastery of all math facts is to enroll your child on this free website. If they complete this program they will know their math facts. <https://xtramath.org>

A second way is to print math drill worksheets at math-drills.com or purchase a set of flash cards from the dollar store and have your child practice until the facts become automatic.

If you have any questions please email the school at sgarza@spxdallas.org or khuggins@spxdallas.org

Sincerely,
SPX School Staff
